One teacher and one student working with ProjectX

Objective

The aim of this project is twofold: on one hand we want to bring closer the needs of the companies to schools and, on the other hand, to improve the pedagogical methodology -way of teaching at schools- allowing teachers to pay attention to each singular student, and concerning about their own personal learning rhythms.

ProjectX

We will accomplish our aim through "ProjectX" which is a methodological guide for the student to carry out a concrete activity, one to one with the teacher, in which theory and practice are both perfectly integrated and is related to the real workplace.

Benefits for Schools

By using ProjectX students will work on situations that happen at the work place, increasing their competitiveness on the labour market.

As the ProjectX include the units of Learning Outcomes the future mobility of students and teachers is facilitated. In this way we will start a network of schools using this methodology that can grow by including in the future new schools and new ProjectX.

Impact

Each ProjectX will be developed on the basis of Learning Outcomes, which means we will also create a tool based in the ECVET credit system that will allow mobility of students between the participating institutions. In this way we are aligned with the European Strategy 2020 which boosts the mobility of students and teachers in a high grade of quality.
