A. PRESENTATION

	Opinion (thick)		Proposal / Comment
Student		X	Very clear
			
Teacher		X	Very clear , no question from the student .
			

B. THEORETICAL KNOWLEDGE

	OBJECTIVE			REFERENCE		
Student		X	The theoretical knowledge seems to be very hard . I know most of the terms			I found all the reference in the annexe folders There are very clear but in the student guide the name of the reference a little bit confusing. In each reference maybe give the number of the pages to read . It takes a long time.
						
Teacher		X	The objectives are graduals and complete Problem : only # 1-2-3 for five different items			The reference are in accordance to the objectives. The reference are good but the student doesn't know in what order he has to read them . The references are too long : 64 , 12 , 32 pages (annexe 1). Same for annexe 3 . The schematics are clear

ACTIVITIES

	ACTIVITY			REFERENCE		
Student		X	Software is easy to understand , user friendly . Very insteresting Lost with too many documentations, and no guidance . In each reference maybe give the number of the pages to read . It takes a long time.		X	Ok
						
Teacher			Maybe give a quick questionnaire, as a synthesis of the resources, with the name, the number of the page the student has to have a look on. The student enjoy the activity, creating and simulating a motor starter		X	ok

General commentary

Student

This projectX is very pleasant to perform ,especially the practical activities.

The theoretical knowledge is very important for that kind of field .

I'm very impatient to perform that kind of projectX abroad , and valid some part of my curricula for my diploma.
